

Skoda Fabia.

More than quarter of a million Fabias are built every year – get your perfect model at Specialist Cars Skoda.

The Skoda Fabia is the perfect choice for motorists that want a small but spacious car that is popular and reliable and, with the seven trim levels and ten engines available there really is something to suit everyone.

Across the range there are six petrol and four diesel engines, ranging from 1.2 6v 60PS to 1.6 TDI 105PS. These engines (excluding the 1.2 6v 60PS) all qualify for zero road tax for the first year and are available in the seven trim levels; S, SE, Elegance, Scout, vRS, GreenLine and Monte Carlo.

Which one suits you?

Fabia (S, SE, Elegance)

The multi-award-winning Fabia is a small city car that offers you the space and versatility required for everyday life. With space for five people and still with enough room in the back for your luggage, the Fabia is the ideal small family car.

Fabia Estate

Despite being the smallest car in Skoda's five model range, the spacious Fabia's estate version offers more luggage space than most cars from the class above with up 1,485 litres with the rear seats folded down.

The S, SE, Elegance, Scout, Greenline and vRS are all available as an estate giving motorists even more fantastic options.

Fabia vRS

The sportiest member of the Fabia family, the vRS was made famous when it launched in 2010 in the award-winning television advert, which featured motorbikes and snakes and was the follow-up to the famous Fabia cake campaign. This car is ideal for those who like a car that packs a punch.

At the heart of the Fabia vRS is a remarkable 1.4 TSI 180bhp engine. By far the most powerful engine ever offered in a production Fabia, it gives both versions (Hatch and Estate) a 0-62mph time of just 7.3 seconds and a top speed of 139mph and 140mph respectively.

The state-of-the-art 1.2 TSI engine uses direct-injection and turbocharging technology and is available with a seven-speed, twin-clutch DSG gearbox. DSG is standard on vRS models.

Fabia Greenline II

One of the biggest technological changes in the second-generation GreenLine version is a new three-cylinder turbocharged engine, 1.2 TDI CR DPF 75PS with a consumption of just 83.1mpg and CO₂ emissions of 89g/km. This means that the Fabia Greenline II is not only congestion charge exempt but that motorists can go 940 miles on one tank of fuel.

Every Škoda Fabia is fitted with ABS, electric front windows, a single CD player as standard, six airbags and a 3.5mm AUX socket to connect to an MP3 player. Optional equipment includes heated seats, sports suspension, climate control and leather upholstery.

Prices start at £9,330 (OTR) for the 1.2 6v 60bhp S and rises to £16,495 (OTR) for the vRS Estate.
