

Skoda Roomster Practical Yet Playful

The Škoda Roomster's design is defined by two distinct areas: the 'driving room' at the front and the 'living room' behind and, like the name suggests, it has loads of space; in fact, its maximum load capacity of 1,810 litres is big enough to carry a concrete block from the Hoover dam!

The Varioflex rear seats slide, recline, fold and remove offering drivers 20 seating combinations and plenty of storage is designed in with clever features like a double glovebox and a 1.5 litre bottle holder.

However, despite its practicalities, the Roomster's driving position makes it feel like a conventional hatchback, so the driver doesn't lose out on driving fun.

The state-of-the-art 1.2 TSI 105bhp is available with twin-clutch DSG gearbox for exceptional performance and fuel economy and the new 1.6 TDI CR diesel emits just 124g/km CO₂ meaning it costs £0 a year to tax.

Roomster is available in three distinct variants: S, SE and Scout and customers can choose between six engines – four petrol and two diesel, ranging from 1.2 12v 69PS to 1.6 TDI CR 105bhp.

Prices start from £11,640 (OTR)
