Description

This 2024 MINI Electric Cooper E Exclusive is a rare find, having been driven for only 3,218 miles by a single owner. As a MINI manufacturer approved vehicle, it offers peace of mind alongside its modern electric powertrain. The car features a 41 kWh battery that provides a range of 186 miles when new, making it well suited for daily driving and city commutes. It is finished in the Exclusive trim, which adds a refined touch to the iconic MINI design, ensuring that the vehicle remains both stylish and practical for its next driver. The performance of this electric model is particularly notable, as it can accelerate from 0 to 62 mph in just 7.3 seconds, providing a responsive driving experience that stands out in its class. Charging is equally efficient, with the ability to reach an 80 percent charge in just 32 minutes at a fast public charging point. For home charging, the vehicle takes 5 hours and 45 minutes to fully charge using a standard 7kW wallbox. These capabilities combine to offer a convenient and capable electric vehicle that balances quick acceleration with practical charging times.
