Description

With only one previous owner and low mileage of just 4492 miles, this 2024 MINI Electric Countryman is a superb example of a nearly-new vehicle. As an all-electric, four-wheel drive car, this MINI offers a refined driving experience. This is the SE Classic variant in the Classic trim. You can be assured of its quality as it is MINI manufacturer approved. The heated steering wheel is a welcome addition, especially on cold mornings. The 67 kWh battery provides a maximum range of 267 miles when new. Charging at home using a 7kW charger takes approximately 10 hours for a full charge. For quicker top-ups, the fastest public charging time from empty to 80% is just 33 minutes. The impressive acceleration, achieving 0-62mph in just 5.6 seconds, demonstrates how this vehicle offers enhanced performance compared to other similar models.
