### Description

This 2025 BYD Dolphin Comfort is an exceptional example, boasting an incredibly low mileage of just 89 miles, making it practically new. As an electric vehicle, it offers a substantial battery capacity of 60 kWh, providing a maximum range of 265 miles on a full charge. This Comfort trim model is equipped with convenient Keyless Entry and Keyless Start, alongside striking LED Headlights for enhanced visibility. For added comfort, it features Heated Front Seats, perfect for those colder journeys. Parking is made simpler with three Rear Parking Sensors, and you can seamlessly integrate your smartphone using Apple CarPlay and Android Auto. The MOT is valid until July 2028, and it has had only one owner. The BYD Dolphin Comfort truly stands out with its impressive performance, achieving 0-62mph in a swift 7.0 seconds, demonstrating its responsive acceleration. This capability is a key indicator of how this vehicle performs compared to others in its class. Furthermore, the generous boot space offers ample room for luggage or shopping, a practical advantage for everyday use. The rapid charging capability is another significant benefit, allowing you to charge from empty to 80% in just 41 minutes at a public charging station, minimising downtime and maximising your driving convenience.
