Description

This 2020 Tesla Model 3 Long Range boasts exceptionally low mileage for its age, having covered just 42,679 miles. As an electric vehicle with Four Wheel Drive, it offers a substantial battery capacity of 78 kWh, providing an impressive maximum range of 360 miles when new. This Model 3 also features convenient Keyless Go, LED headlights for enhanced visibility, and a heated steering wheel for added comfort. Inside, you'll find 12 way power adjustable front and rear seats, all of which are heated, and rear parking sensors to assist with manoeuvring. The charging capabilities of this Tesla Model 3 are noteworthy, with a full charge at home using a 7kW charger taking approximately 12 hours, and a rapid charge to 80% on a public charger achievable in just 26 minutes. These figures indicate a superior charging experience compared to many other electric vehicles. Furthermore, the generous boot space offers ample practicality for everyday use and longer journeys, making this Model 3 a compelling choice for those seeking efficiency, comfort, and advanced technology.
