Description

This 2026 BYD Sealion 7 Excellence is a superb example, having had only one owner since new. This electric vehicle boasts a Four Wheel Drive drivetrain and a substantial 91 kWh battery, offering a maximum range of 312 miles. For your convenience, it features front and rear parking radars with parking assistance, a 50W smartphone wireless charging pad, and dual zone climate control. Inside, the driver's seat is electrically adjustable with 8-way control and position memory, while Blind Spot Detection provides an extra layer of safety. The Sealion 7 Excellence excels with its impressive performance, achieving 0-62mph in just 4.5 seconds, a speed that sets it apart from many similar vehicles. Its large boot space is another key advantage, offering ample room for luggage or shopping. When it comes to charging, a full charge at home using a 7kW charger takes approximately 14 hours and 54 minutes, while the fastest public charging can replenish the battery from empty to 80% in a swift 27 minutes, demonstrating its practicality for longer journeys.
