Description

This 2022 Volkswagen ID.4 Pure Life is a well-maintained electric vehicle that has had only one owner from new. With a very low mileage of 25,234 miles, this Volkswagen manufacturer approved model offers a reliable entry into electric driving. The vehicle is equipped with heated front seats for added comfort during colder journeys. As a fully electric model, it features a 55 kWh battery that provided a maximum range of 213 miles when new. The ID.4 is designed for practical daily use, offering a large boot space that provides ample room for luggage or shopping. Charging is straightforward, with a full home charge using a 7kW charger taking 7 hours and 30 minutes. For longer trips, the vehicle supports rapid public charging, allowing the battery to reach an 80 percent charge in just 38 minutes. These features combine to make this model a capable and efficient choice for those seeking a modern electric vehicle that balances range, charging speed, and interior space.
