Description

This 2026 Geely EX5 Pro is essentially a brand new vehicle, having covered only 5 miles under the care of its single owner. As an electric vehicle, this Pro variant combines modern efficiency with a practical 60 kWh battery that offers a range of 258 miles when fully charged. The interior is equipped with the FLYME AUTO in-vehicle infotainment system, which includes Bluetooth connectivity for seamless media streaming. Comfort and convenience are prioritised with heated front seats and intelligent cruise control, which features adaptive cruise control functionality. For added ease during daily use, the vehicle includes rear parking sensors and all-LED automatic headlights that switch on when needed. Performance is a key highlight of this model, as it is capable of accelerating from 0 to 62 mph in just 6.9 seconds, providing a responsive driving experience. The vehicle is designed for modern convenience, particularly with its charging capability, which allows for a rapid charge from empty to 80 percent in just 32 minutes at a public charging station. These specifications demonstrate that the Geely EX5 Pro is built to balance quick acceleration with efficient energy management, making it a capable choice for those seeking a reliable and well-equipped electric vehicle.
