Description

This 2026 Geely EX5 Pro is a nearly new electric vehicle that has covered just 100 miles from its single owner. As a Pro variant, this electric model comes equipped with a 60 kWh battery that offers a maximum range of 258 miles when new. The interior features automatic air conditioning for climate control, along with heated front seats for added comfort. Connectivity is straightforward with wireless Apple CarPlay and wireless Android Auto, while visibility is managed by all-LED automatic headlights that switch on when needed. The performance of this vehicle is notable, as it can accelerate from 0 to 62 mph in 6.9 seconds, providing a responsive driving experience. Charging is efficient for longer journeys, with the capability to reach an 80 percent charge from empty in 32 minutes when using a fast public charger. These specifications combine to offer a practical and modern electric driving experience that balances quick acceleration with convenient charging times and essential technology.
