Description

This 2026 Geely EX5 Pro offers a rare chance to own a vehicle with just 100 miles on the clock and only one previous owner. As an electric vehicle, this Pro variant is equipped with a 60 kWh battery that provides a maximum range of 258 miles when new. Inside, the cabin is finished with Cloud synthetic leather and includes a heat pump air conditioning system for efficient climate control. Comfort is prioritised with heated front seats and a heated steering wheel, while technology needs are met through wireless Apple CarPlay integration. The performance of this model stands out, as it can accelerate from 0 to 62mph in 6.9 seconds, providing a responsive driving experience. Practicality is further enhanced by its charging capability, which allows for a rapid charge from empty to 80% in just 32 minutes at a public charging point. These specifications combine to offer a modern and efficient driving solution that balances quick acceleration with convenient charging times, making it a capable choice for those transitioning to electric motoring.
