### Description

This 2023 Volkswagen ID.4 Pure Life is a Volkswagen manufacturer approved vehicle that has covered a very low mileage of just 15,870 miles. As an electric vehicle, this model features a 55 kWh battery that offers a maximum range of 213 miles when new. The interior is equipped with heated front seats for added comfort during colder journeys. This specific example combines the reliability of the manufacturer approved programme with the practical benefits of a modern electric SUV. The ID.4 is designed to make electric motoring straightforward, offering a full charging time of 7 hours and 30 minutes when using a standard 7kW home charger. For longer trips, the vehicle supports rapid public charging, allowing the battery to reach an 80 percent charge in just 38 minutes. Beyond its charging

capabilities, the vehicle provides a large boot space, making it a practical choice for those who need extra room for luggage or shopping. These features ensure that the vehicle remains a versatile and efficient option for daily driving needs.
