Description

The 2018 Tesla Model X 75D offers a practical and modern approach to electric family transport. This all-electric vehicle features a four-wheel drive drivetrain powered by a 75 kWh battery, which provided a maximum range of 259 miles when new. The exterior design is complemented by a fixed panoramic glass roof that enhances the cabin atmosphere, while the keyless entry system adds a layer of convenience to daily use. This model stands out for its blend of performance and utility, capable of accelerating from 0 to 60 mph in 6.0 seconds. It is designed to handle demanding tasks with a towing weight capacity of 2268 kg, making it a versatile choice for those who need extra capability. Charging is straightforward, with a full home charge taking 12 hours using a 7kW charger, or a rapid 45-minute charge to reach 80 percent capacity at public stations. Furthermore, the vehicle provides a large boot space, ensuring there is ample room for luggage and equipment on longer journeys.
