Description

This 2026 BYD Atto 3 Comfort offers a rare chance to own a nearly new electric vehicle with only 490 miles on the clock and a single previous owner. As an all-electric model, it is equipped with a 60 kWh battery that provides a maximum range of 260 miles when new. Charging is straightforward, taking 9 hours and 42 minutes for a full charge at home using a 7kW charger, or as little as 40 minutes to reach 80 percent capacity at a fast public charging point. The interior is well-appointed with heated front seats, a panoramic sunroof with an electrically adjustable sunshade, and a 360 degree view camera system to assist with parking. Practicality is further enhanced by the inclusion of a towing hook and the convenience of keyless entry and start. The Atto 3 stands out in the electric vehicle market by balancing advanced technology with everyday

usability. Its spacious boot provides ample room for luggage or shopping, making it a versatile choice for families or those needing extra cargo capacity. The combination of the panoramic sunroof and the comprehensive camera system creates a driving environment that feels both open and secure, while the efficient charging times ensure that long journeys remain manageable. By integrating these thoughtful features into a modern electric platform, this vehicle provides a reliable and comfortable driving experience that is well-suited to contemporary travel needs.
