Description

This 2026 Kia EV3 GT-Line S is a fully electric vehicle that has had only one owner from new. As a Kia manufacturer approved model, it offers peace of mind regarding its condition and history. This particular trim level represents a high specification within the range, combining modern electric performance with the reliability expected from the manufacturer. The EV3 is designed for practical daily use, featuring an 81 kWh battery that provides a maximum range of 362 miles when new. Charging is straightforward, with a full charge at home using a 7kW charger taking 8 hours and 3 minutes, while public rapid charging allows for a boost from empty to 80 percent in just 35 minutes. Safety and parking are made easier through a comprehensive suite of technology, including a reversing camera system, front and rear parking

sensors, and a 360 surround view monitor. Furthermore, the vehicle is equipped with advanced driver assistance systems such as blind spot collision avoidance assist and a blind spot view monitor, which help provide extra awareness while on the road.
