Description

The 2026 Audi Q6 e-tron Black Edition is an electric vehicle that combines modern design with practical performance. This specific model is an Audi manufacturer approved vehicle and has had only one owner from new, ensuring it has been well maintained. As a Black Edition variant, it features a four wheel drive drivetrain powered by a 100 kWh battery. The vehicle comes equipped with the Technology Pack, which includes air conditioning, a head up display, LED headlights, a premium branded sound system, heated seats, and a heated steering wheel. This electric SUV offers a range of 351 miles on a full charge, making it suitable for longer journeys. When charging at home using a 7kW charger, it takes 15 hours to reach full capacity, while the fastest public charging points can charge the battery from empty to 80 percent in 24 minutes. Performance is a key highlight, with the vehicle capable of accelerating from 0 to 62mph in 5.4 seconds. Practicality is also prioritised, as the vehicle offers a large boot space and a towing weight of 2400 kg, providing versatility for both daily driving and heavier tasks.
