Description

The 2025 BYD Sealion 7 Design is a fully electric vehicle that comes with the assurance of being BYD manufacturer approved. This particular example has had only one owner from new, reflecting its well-maintained status. As a Design variant, it combines modern electric performance with a practical layout, making it a suitable choice for those looking for a reliable and contemporary vehicle. This model offers a blend of performance and comfort, highlighted by its ability to accelerate from 0 to 62mph in 4.5 seconds thanks to its four wheel drive system. The 83 kWh battery provides a maximum range of 283 miles, and when using a public rapid charger, it can reach an 80 percent charge in 36 minutes, while a home 7kW charger takes 13 hours and 30 minutes. Inside, the cabin is designed for comfort with a panoramic roof

featuring an electrically adjustable sunshade, and heated rear seats. The driver benefits from an 8-way electrically adjustable seat with memory settings, which is also ventilated and heated. Practicality is further enhanced by a large boot space and front and rear parking radars with parking assistance sensors to help with manoeuvring.
