### Description

This 2023 MG4 Trophy Long Range is a fully electric vehicle that has been well maintained, coming with a full service history and having had only one owner from new. As a Trophy Long Range model, it combines modern electric performance with a practical design, making it a suitable choice for those looking for a reliable and well-cared-for electric car. The vehicle offers a 64 kWh battery that provides a maximum range of 270 miles when new, ensuring it is capable of handling longer journeys with ease. Charging is straightforward, with a full charge taking 10 hours using a standard 7kW home charger, or as little as 34 minutes to reach 80 percent capacity at a fast public charging

point. Inside, the cabin is equipped with features designed for comfort and convenience, including heated front seats and a heated steering wheel. Technology is well integrated, featuring Apple CarPlay and a wireless mobile phone charger to keep devices connected on the move. Practicality is also a key strength, as the vehicle offers a large boot space for luggage, while rear parking sensors assist with manoeuvring in tight spaces.
