Description

This 2023 Peugeot E-208 GT is a fully electric hatchback that offers a modern driving experience. As a Peugeot manufacturer approved vehicle, it provides peace of mind regarding its condition and history. Having covered only 15,415 miles, this example has low mileage for its age, making it a practical choice for those seeking a well-maintained electric car. The GT trim level enhances the vehicle with several distinct design elements, including 17-inch Bronx diamond-cut two-tone alloy wheels and an aluminium pack. It features specific chrome badging, such as the front lion emblem and the e-monogram on the C-pillar and tailgate, alongside a single exhaust tailpipe design. For charging, the vehicle is equipped with a 50 kWh battery that offers a range of 224 miles when new. It supports efficient charging, with a full home charge using a 7kW

wallbox taking 7 hours and 33 minutes, while public rapid charging can bring the battery from empty to 80% in just 30 minutes. A 6-metre Mode 3 Type 2 cable is included to facilitate convenient wallbox charging.
