Description

The 2025 BYD Sealion 7 Comfort is a modern electric vehicle that has been maintained by only one owner. With a low mileage of 2,752 miles, this example is BYD manufacturer approved, providing peace of mind regarding its condition and history. As an electric model, it offers a practical approach to daily driving, supported by an 83 kWh battery that provides a maximum range of 300 miles when new. Charging is straightforward, with a full home charge using a 7kW unit taking 13 hours and 30 minutes, while public rapid charging can replenish the battery from empty to 80% in just 36 minutes. This vehicle is designed to balance performance with everyday convenience, featuring a large boot space that makes it a practical choice for families or those needing extra room. Drivers can enjoy a responsive experience, with the car capable of accelerating from 0-62mph in 6.7 seconds. Comfort and safety are prioritised through a range of included technology, such as adaptive cruise control and blind spot detection. Parking is made easier with front and rear parking radars, while the interior is equipped with keyless entry and start. The driver seat is particularly well appointed, offering ventilation, heating, and a memory adjustment function to ensure a comfortable position on every journey.

Alliance Centre, Greenwell Road, Aberdeen, United Kingdom, AB12 3AX
