Description

The 2025 BYD Seal Excellence is a fully electric saloon that has had only one owner from new. This model features an 83 kWh battery, which provides a maximum range of 323 miles on a full charge. When using a public rapid charger, the battery can be replenished from empty to 80 percent in 42 minutes. The vehicle is equipped with a four wheel drive drivetrain, ensuring power is distributed effectively across all wheels for a stable driving experience. This Excellence trim is designed with a focus on performance and driver assistance, highlighted by its ability to accelerate from 0 to 62mph in 3.8 seconds. To support the driver, the car includes adaptive cruise control and intelligent cruise control, alongside blind spot detection to assist with lane changes. Practicality is enhanced by keyless entry and start, while parking is made simpler with four rear parking sensors. Visibility is provided by LED headlights, ensuring the vehicle is well equipped for various driving conditions.
