Description

The 2026 Changan Deepal S07 Standard is a modern electric vehicle that offers a practical and efficient driving experience. This particular example has covered only 10 miles, representing very low mileage for its age, and has had only one owner from new. As an electric model, it is equipped with an 80 kWh battery that provides a maximum range of 295 miles when fully charged. For those needing to top up on the go, the vehicle supports fast public charging, capable of reaching an 80 percent charge from empty in 54 minutes. Inside, the cabin is designed with comfort and convenience in mind, featuring automatic air conditioning with climate control to maintain a pleasant environment. The driver benefits from heated and ventilated seating, along with a memory function to easily recall preferred seating positions. Accessing and

starting the car is straightforward thanks to the keyless entry and start system. The interior experience is further enhanced by a 1.9 square metre panoramic roof, which includes an electric sunshade, providing an open and airy feel that distinguishes this model from many others in its class.
