Description

This 2023 CUPRA Born V3 is an all-electric vehicle that comes with the peace of mind of being CUPRA manufacturer approved. Having had only one owner from new, this car has covered 18,256 miles, which is a very low mileage for its age. It represents a well-maintained example of this modern electric hatchback, combining the reliability of manufacturer backing with a clear and simple ownership history. The V3 trim offers a practical and efficient driving experience, highlighted by a 62 kWh battery that provides a maximum range of 264 miles when new. For those charging at home using a 7kW wallbox, a full charge takes 9 hours and 30 minutes, while public rapid charging is highly convenient, capable of taking the battery from empty to 80% in just 37 minutes. Performance is responsive, with the ability to accelerate from 0-62mph in 7.3 seconds,

and the vehicle is designed with a large boot space to ensure it remains a versatile choice for daily use.
