Description

This 2026 Kia EV4 GT-Line is an all-electric vehicle that has been maintained by only one owner. As a GT-Line model, it combines modern electric performance with a practical design, powered by an 81 kWh battery. This vehicle is designed for those seeking a reliable and efficient driving experience, supported by a clear ownership history. The EV4 stands out for its impressive range, offering up to 362 miles on a single charge when new, which provides significant freedom for longer journeys. Charging is flexible, with the ability to reach an 80 percent charge in just 35 minutes at a fast public charging station, or a full charge at home in 35 hours and 44 minutes using a 7kW charger.

Practicality is a key focus, as the vehicle features a large boot space for luggage and shopping. Inside, the cabin is equipped with technology to enhance comfort and safety, including automatic air conditioning with climate control and a wireless mobile phone charger. Driving is made easier and safer with Smart Cruise Control 2.0, which includes stop and go functionality, a reversing camera system for parking assistance, and blind-spot collision avoidance assist.
