Description

This 2019 Tesla Model 3 Long Range is an all-electric vehicle equipped with a four-wheel drive system. It features a 78 kWh battery, which provided a maximum range of 348 miles when the vehicle was new. As no specific provenance information is available, this description focuses on the core specifications of this electric model. The vehicle offers a range of practical features designed to enhance the driving experience, including adaptive cruise control and a park assist camera with a front camera for easier manoeuvring. Comfort is managed through two-zone climate control, while connectivity is supported by a Bluetooth connection. Convenience is further improved by keyless entry and remote control capabilities via the Tesla app. Charging is flexible, with a full charge taking 12 hours using a 7kW home charger, or a rapid 26 minutes to reach 80 percent capacity when using the fastest public charging points. The impressive 348-mile range at new makes this model a capable choice for those seeking an electric vehicle with significant distance capabilities.
