Description

The 2026 BYD Sealion 7 Excellence is a fully electric vehicle that combines modern performance with practical ownership history. This particular example has been well maintained by its single owner and has covered a low mileage of 2,666 miles since it was first registered. As an Excellence trim model, it features a four wheel drive drivetrain powered by a 91 kWh battery, which provides a maximum range of 312 miles when new. Charging is flexible, with a full charge at home using a 7kW charger taking 14 hours and 54 minutes, while the fastest public charging option can replenish the battery from empty to 80 percent in just 27 minutes. This vehicle offers a blend of convenience and impressive capability that sets it apart. Drivers can enjoy rapid acceleration, with the ability to reach 0-62mph in 4.5 seconds, while the interior is designed for comfort and ease of use. Notable features include keyless entry and start, dual zone climate control, and a driver seat with 8 way electrical adjustment and position memory. Passengers in the rear benefit from heated seats, and the cabin includes a 50W wireless smartphone charging pad. Beyond these amenities, the vehicle provides a large boot space, making it a practical choice for those who need extra room without compromising on performance or technology.
