Description

The 2026 BYD Sealion 7 Excellence is a fully electric vehicle that has been maintained by only one owner. This four wheel drive model is equipped with a 91 kWh battery, which provides a maximum range of 312 miles when new. For home charging, a 7kW unit will fully charge the battery in 14 hours and 54 minutes, while the fastest public charging option can take the battery from empty to 80 percent in just 27 minutes. This vehicle offers a blend of performance and convenience, highlighted by its ability to accelerate from 0 to 62mph in 4.5 seconds and its large boot space. The interior is designed for comfort and ease of use, featuring a heated leather multi-function steering wheel and a driver seat with 8-way electrical adjustment and position memory. Technology is integrated throughout, including a head-up display and a 50W wireless smartphone charging pad. Practicality is further enhanced by the inclusion of a towing hook and towbar, making this a versatile choice for various driving needs.
